

```
const toggleButton = document.getElementById('theme-toggle');

toggleButton.addEventListener('click', () => {
  // Check current state
  const currentTheme = document.documentElement.getAttribute('data-theme');

  // Switch state
  if (currentTheme === 'dark') {
    document.documentElement.removeAttribute('data-theme');
  } else {
    document.documentElement.setAttribute('data-theme', 'dark');
  }
});
```
